**PROJECTS****Web App Development:**

Built a React/Node.js app with MongoDB integration.  
Built a couple of useful backend tools using Node.js/Bash.

**Cybersecurity:**

Conducted successful vulnerability assessments using ethical hacking tools.  
Built my own web pen-testing tools and scripts using Node.js, C++ and Bash.

---

**COMMUNICATION**

I am a team player, quick to learn and adapt to the environment. What I lack in oral communication, I make up in hard work to improve team efficiency.

---

**LEADERSHIP**

I work best being given orders and tasks to tackle because I am more of a soldier than a leader. But given a chance to lead, I'm sure I can thrive at it with time.
